Biodiversity and Biocultural Conservation Laboratory
University of Texas at Austin

Technical Note 53

Date 12 January 2009

Croton alabamensis var *texensis* Records from Pace Bend Park, Travis County

Tiffany Hollon and Sahotra Sarkar

Visual surveys were carried out during Spring 2008 on 11, 14, and 26 March and 6, 19, and 20 April. With prior permission, surveys were extended to the High Lakes Baptist Encampment on 19 April. Because of the small area of the park, the exploratory nature of this initial survey, and because most populations were believed to be known, surveys were opportunistic rather than being based on transects.

Table 1 lists all the points at which individuals were identified. The main new result was that individuals were found at higher elevations than reported before, much higher than the paved circular road that skirts the park.

More surveys are planned for Spring 2009, earlier in the year, so that visual identification of the plants by color is even easier. Because of the discovery of new populations, this survey will be systematic, based on gradsect sampling.
