KNOW ALL MEN BY THESE PRESENTS:

27-1154

That Whereas, James H. Moore has designed the machinery described and schematically shown below, and does intend to develop, manufacture and sell said machinery:

\* all rotation clockwise when viewed from above

\*\* pressure on point A. engages clutch mechanism in power in-put shaft to rotate rotating axle 180° - releases clutch engagement at completion of 180° rotation.

The above mechanism is designed for removing grass, weeds, etc. from under and on the sides of such structures as highway guardrails, and from around supporting posts of such guardrails. It is the original design of James H. Moore, 3302 Stardust Drive, Austin, Texas. It involves the primary principles of (1) Use of "blades or brushes" made of flexible rubber or any other similar material, whether plastic, vinyl or other synthetic for this or any other similar purpose; (2) Use of a fully rotating axle with rotary blades, brushes or other devices attached at each end for the purpose (s) described above.

WITNESS MY HAND at Austin, Texas this 2nd day of April, 1970.

*James H. Moore*

THE STATE OF TEXAS  
COUNTY OF TRAVIS

Moore, known to me to be the person whose name is subscribed to the above and foregoing instrument, and acknowledged to me that he executed the same for the purposes and consideration therein expressed.

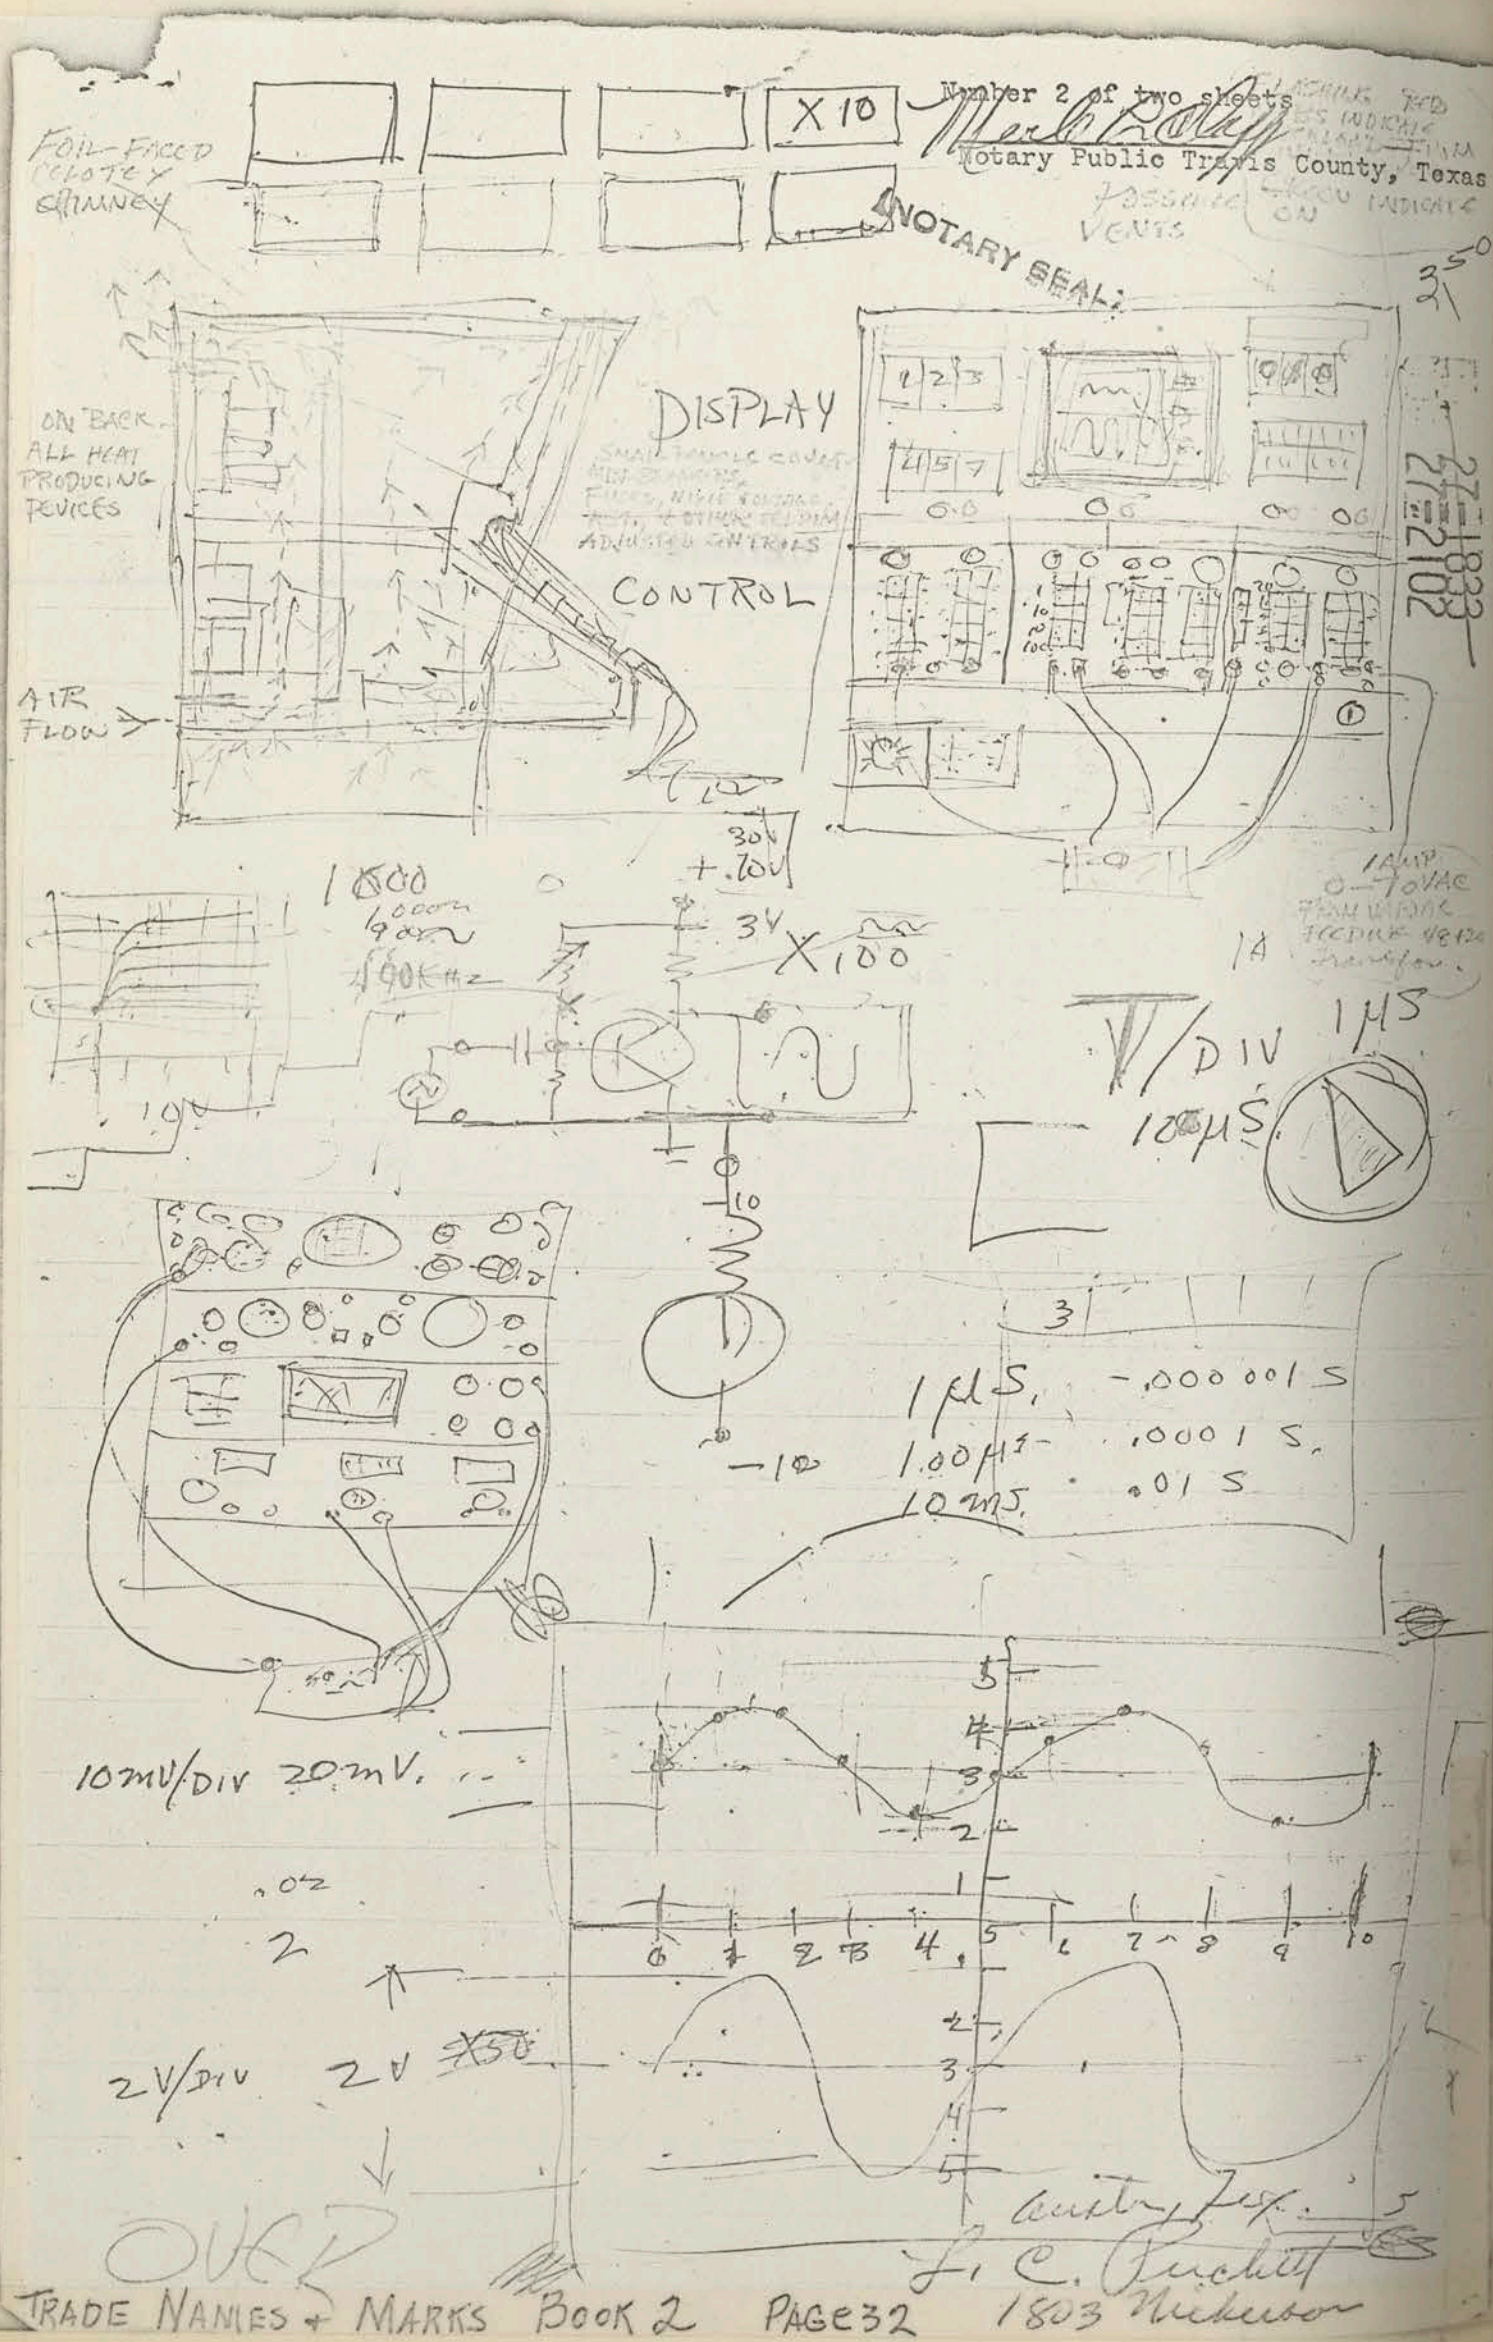

Given under my hand and seal of office this 2nd day of April, 1970.
